ITUE301: Advanced Web Development Frameworks - Open-Book Practical Exam

Date: 24/08/2026 | Candidate Roll No: 24IT047 | Batch: C1

SET A: QuickBite Food Ordering System - Execution Report

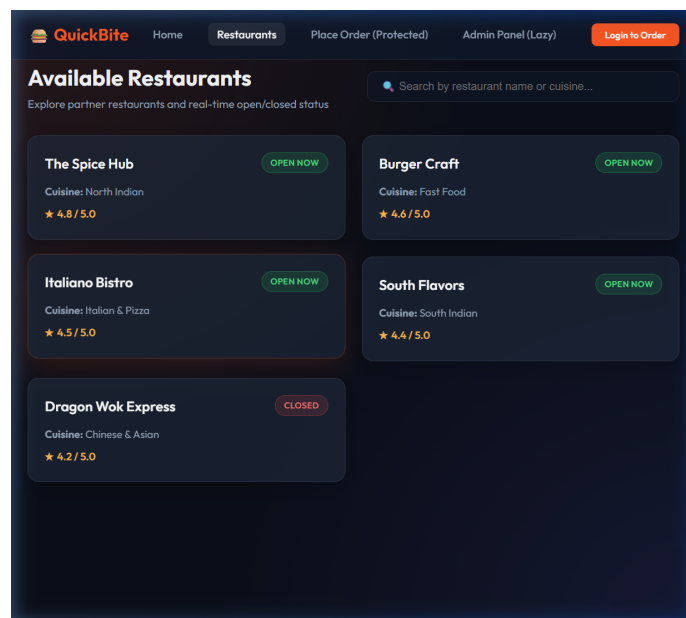

This practical examination report demonstrates the complete implementation and verification of all five tasks for SET A using React (frontend), Express.js (backend), and MongoDB with Mongoose.

Task Completion Summary:

- Task 1: React Architecture:** HomePage, RestaurantsPage, OrderPage & RestaurantCard props + status badges
- Task 2: React Routing & State:** React Router, ProtectedRoute (/order), AuthContext & Lazy AdminPanel
- Task 3: Express API & Middleware:** 5 REST endpoints at /api/v1/, requestLogger, authGuard & errorHandler
- Task 4: REST API Consumption:** useEffect fetch GET /api/v1/restaurants, loading/error states & client search
- Task 5: Mongoose & Validation:** Customer, Restaurant, Order schemas with .populate() and 400 validation error handling

Screenshot 1: RestaurantsPage Rendering Live MongoDB Data (Task 1 & Task 4)

Live data fetched from GET /api/v1/restaurants with client-side search filter & open/closed status badges.

Screenshot 2: POST /api/v1/orders Returning HTTP 201 Created (Task 3 & Task 5)

Form order submission placing order to Express REST API with Bearer token authentication and Mongoose validation.
